

# TEENAGE MUTANT NINJA TURTLES®

## TURTLE IN A TURTLE

Kids.  
follow these  
simple blueprints,  
it's easy!

• When they climb down the Escape Cable, the bro's can continue their workout by pounding the SHREDDER PRACTICE DUMMY into pusillanimous pulp. Install the Shredder Dummy in the hole on the back shell, as shown.

• Next, you can install incredible PIZZA POWER DISC LAUNCHER. Plug the Launcher into the hole in the rear shell, as shown. Now Raph and Mike can use it to defend their Samurai Sewer Lair against any hungry horde. It can also be used to serve emergency meals!

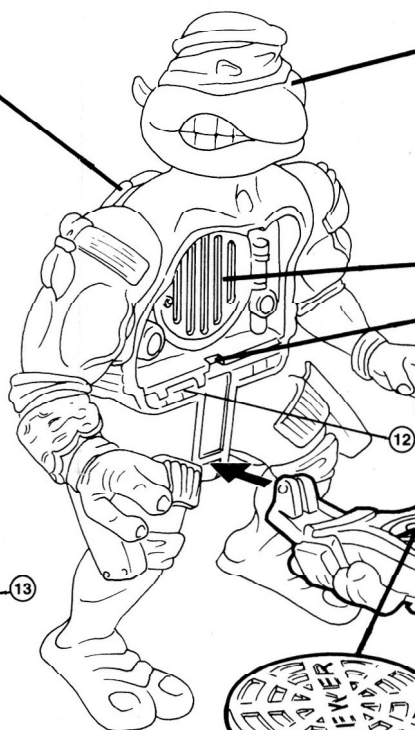

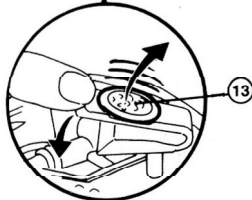

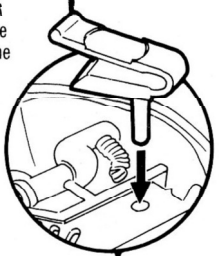

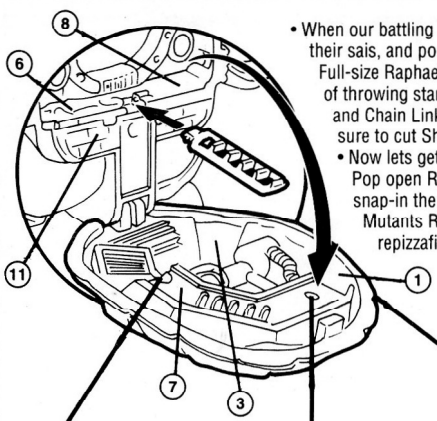

• To fire the Pizza Power Disc Launcher, place the pepperoni PIZZA PROJECTILE onto the pizza launcher. Pull back on the launch lever. Place the Pizza Projectile on the launcher, then release the launch lever. BUT HOLD ON DUDE! CAUTION! Never launch a Pizza Projectile toward someone's face, mouth, or eyes.

• The Center of Raphael's back shell also has a swing-down EMERGENCY EXIT SLIDE. This is the Turtles' primary escape route if the Samurai Sewer Lair is ever discovered. It's also handy for emergency pizza deliveries.

ASST. NO. 13080  
STOCK NO. 13084  
AGES 4 AND UP

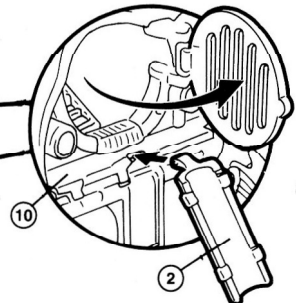

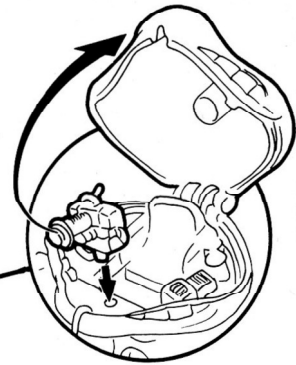

**WARNING:**  
CHOKING HAZARD-Small parts.  
Not for Children under 3 years.

• When our battling bro's, the Turtles need somewhere safe to settle their minds, sharpen their sais, and pop a few pepperonis, they head straight for Raphael's Samurai Sewer Lair. Full-size Raphael gives them a safe feeling with his bad bandanna, and bristling bandolier of throwing stars. He can handle a Foot Clan of trouble with his massive Sewer Lid Shield and Chain Link Wrist Bands. And with a pair of sais on his thighs, its no surprise, he'll be sure to cut Shredder down to size!

• Now lets get ready to transpizzafy Raphael into his bodacious Samurai Sewer Lair. Pop open Raphael's front and back shells to reveal the super secret hideaway. Then snap-in the LADDER, facing the back shell as shown, and swing it down. Mini-Mutants Raphael and Michaelangelo can get ready for a little R&R (rest and repizzafication).

• After their workout, our hero's-in-a-half-shell will be ready for a pizza break. But just to make sure they're not disturbed by any fractious foes, lets setup a trap. Snap the SEWER GRATE into the middle of the Lair, as shown. Next install the SEWER SLIDE pointing toward the front shell. Swing it down facing the Ooze Cesspool.

• For a little exercise, Raph and Mike can climb up and down the NINJA ESCAPE CABLE. To install the Escape Cable: Locate the plastic fastener already tied to one end of the string. Plug the fastener into the front shell, as shown. Then thread the Cable through the head, at the point shown, and tie it tight.

• For a surprise ending at the bottom of the slide, install one sai in the holder next to the Ooze Cesspool. If Shredder tries to enter the Lair and slips down the slide, he's sure to get the point! When he's safely inside the Ooze Cesspool, you can cover him up with the SEWER LID SHIELD. Until you're ready to use it, keep the Sewer Lid stored next to the Ooze Cesspool, as shown.

• Last but not least, you'll want to stick-on all of the very cool labels. Check out the pictures for where they go. Better do it now, or Shredder is sure to shred them.
